MEX16 has been reimagined from the ground up — with a modern interface, intelligent insights, seamless mobility, and powerful integrations.

Work Smarter, Not Harder

- AI-enabled scheduling:** Automatically build efficient work schedules.
- Drag-and-drop tools:** Easily assign labor and shift work orders on a calendar view.
- Consolidated mobile app:** One app for all tasks — reducing support needs and speeding up resolution times.
- Faster system performance:** Rebuilt architecture delivers quicker response times, even with large data sets.

Insights That Drive Action

- Interactive dashboards:** Switch between detailed listings and visual summaries.
- Drill-down analysis:** Click through reports to uncover root causes and trends.
- Custom reporting:** Build tailored reports faster, with simplified navigation.
- Audit-ready tracking:** SQL temporal tables provide detailed change history for compliance and accuracy.

Connected From Day One

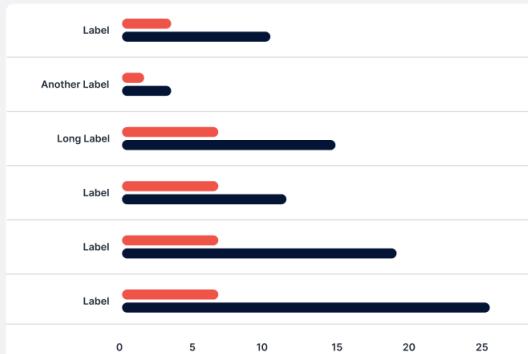

- Modern GraphQL API:** Secure, streamlined, and easy to extend.
- Supports critical workflows:** Purchase orders, invoice processing, inventory, readings, requests, and work orders.
- Open data access:** Retrieve information via Open API for analytics and BI tools.
- User-level security:** API access is secured with per-user keys that safeguard sensitive data and respect regional boundaries.

Mobility That Empowers Everyone

- For Leadership:** Real-time dashboards to track performance and resources on the go.
- For Technicians:** Simplified work order access, streamlined defect resolution, and easy prestart checks in the field.
- For Operations Teams:** Faster communication, reduced downtime, and consistent workflows.

Dashboard - Labour

Preventative Maintenance Schedule

Future-Ready by Design

- Enhanced security:** OAuth authentication, captcha login protection, SQL injection defense, and enforced password policies.
- Future-ready architecture:** Built on Blazor and modern SQL for scalability and faster enhancements.
- Always improving:** Agile development means continuous updates and feature delivery.
- Enterprise capable:** Proven performance for large organizations with complex needs.

MEX Integrations (Bridge)

- Connect with Your Systems:** MEX Bridge links MEX with your finance, ERP, HR, and other third-party programs.
- Flexible Integration:** Built to adapt, ensuring smooth data exchange without heavy custom work.
- Future-Ready:** Keeps MEX open and extendable, so it fits seamlessly into your wider business ecosystem.
