

Simplify Contractor Management

ContractorHub gives your external contractors direct access to the work they perform without requiring a full user license. From task updates to time tracking, everything is centralized in WebTMA so you can reduce admin burden, improve visibility, and keep data accurate.

Core Benefits

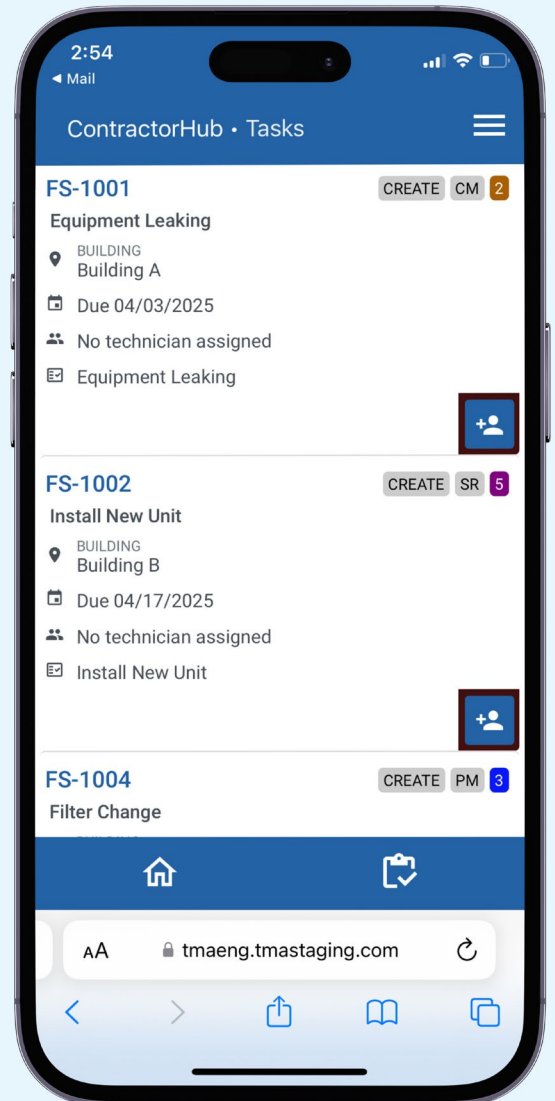

Save time: Free supervisors from repetitive admin tasks by letting contractors log progress, hours, and notes.

Streamline processes: Dispatch and manage contractors quickly with fewer phone calls and manual follow-ups.

Ensure accuracy: Capture real-time contractor updates directly into work orders for reliable reporting and compliance.

Key Capabilities

No extra licensing for contracted technicians: Invite contractors easily via email or text

Streamlined collaboration: Contractors update tasks, add notes, and log time directly on work orders.

Real-time updates: Supervisors and staff see updates instantly within WebTMA.

Mobile-ready access: Contractors can manage work from any device—no logins or app downloads required.

Close communication gaps

Complete maintenance records

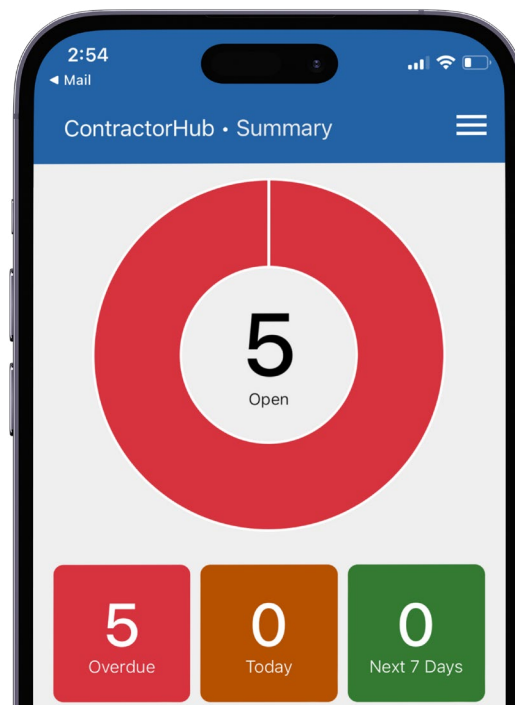

Boost efficiency & visibility

For teams managing outside services

From routine maintenance to specialized projects, ContractorHub is designed for any organization that relies on outside service providers. It centralizes all contractor activity whether you're supplementing in-house staff or managing multiple vendors.
